

Università degli Studi di Pavia

Dottorato di Ricerca in Scienze della Terra e dell'Ambiente

Ecosystem services and environmental accounting

Paolo Vassallo, Chiara Paoli

DISTAV – University of Genoa, Italy

May 20 and 21, 2019

from 9:00 am to 1:00 pm

Department of Earth and Environmental Sciences,
Via S. Epifanio 14, Pavia (“Aula Consultazione”)

The course aims to provide the basis for understanding and applying environmental accounting techniques.

The course includes a brief introduction to the concept of **environmental sustainability** and to the measures of the level of sustainability. Once the concept is clarified the course focuses on the **metrics for the assessment of economic value of nature** (environmental accounting theory).

Techniques for assessing natural capital and ecosystem services based on both '**ecological economics**' assessments and '**biophysical**' assessments will be described in order to present the full range of techniques available for environmental accounting.

The course will end with an examination and participants (max 20) will be given a certificate of attendance. Please register at
